Member questions and answers

Hello dear members,

on the occasion of the November Report, we received **the following question from a member**, which I am pleased to answer below. Many thanks to the member for sending in the question!

Here first the question in the WHOLE, below I go with the appropriate answers to the various "question parts".

Here's the question:

"Hello,

I actually have a question that may interest more members.

The basis of all your activities involves the assertion that all members are earn money with T4. Can you also explain this apart from the claim.

It does not make sense to me. I have not yet earned any money but relatively much Money paid.

This is both historically so, as well as related to the current version.

When this becomes clearer for the individual, perhaps more enthusiasm will arise.

Kind regards

Member"

"Hello,

I actually have a question that more members might be interested in."

Response:

Great, thank you very much. Although this question **is the only one of its kind that has** reached us so far, I agree that it may still be of interest to several members, which is why I am not only **answering** the question(s) in **this announcement so** that everyone who is interested can access it, but I will **also upload this to the FAQ** so that it is **permanently available to everyone, even in the future.**

"The basis of all your activities includes the assertion that all members are earn money with T4. Can you explain that away from the claim as well. "

Response:

Preliminary note: Here I quote in part, from the soon to be published and available "reference book".

**THE "CRISIS-PARADISE"
BALANCED and 6-figured THROUGH THE STORM**

All members earn money with T4-Pro. This is not an assertion, **this is a fact.**

Why? This is quickly explained with our EPP system. **Our EPP system does what follows:**

First of all, a member is a member because he **wants to "learn to make money on the Internet".**

In order to earn money, **it needs an output.** This is a principle, just as in physics, in the subject of electricity generation, for example.

"Basically, performance doesn't **care what makes it happen.** "

We have two options here:

Performance comes about either through the use of capital, since here the **performance is already "stored" in the capital OR** through the use of **labor/time/knowledge/experience/exercise** etc., normally a **combination of ALL.**

There are **many reasons why** our partners cannot provide **this service** (mostly temporarily). Be it that and this especially at the beginning, **neither sufficient capital** is available, **nor the necessary performance**, just in the absence of work / time / knowledge / experience / practice etc....

So that this **performance** can therefore not be **"brought on the road" i.e. retrieved**, simply because it takes some **time to establish this performance** through "learning".

Also, there are various **"inclemencies of life" that** can prevent this **even during membership**, after the initial period, and which can never be excluded. Be it "stressors" in everyday life, professional or even private. **Losses**, e.g. of the job by **dismissal or bankruptcies, illness** for example or infinitely many other events, which make it **temporarily impossible to perform.**

The EPP was developed for precisely these cases and integrated into our coaching program.

This system does nothing else than that **we, as trainers and coaching partners, can provide** this service for our members in a situation where it is temporarily impossible for the individual partner to provide this service, **precisely we can provide this service for the partner.**

We do this by **sharing our performance, our work and our capital**, our results with our partners.

We have regulated in the EPP system exactly how much, of which of our profits, goes proportionately into this pool, which is then **distributed** among the members and is available for **distribution**.

Each member has a precisely **defined share of** this pool through the construction and **systematics of all our memberships**. This means that **each member** receives a **distribution from** the pool **every month**. Of course, only if **we** have profited.

We have been operating this system for almost a year now and **we have been able to book profit every month so far, which we have been able to divide among the members** according to the rules to which we submit ourselves and voluntarily.

The state of affairs concerning the EPP can be **seen by every member** completely transparently and live, i.e. in real time, on **the platform**. Plus the respective monthly reports!

The average of this **provided profit performance**, i.e. **our investment in our members**, achieved to date and fully paid in each case, is currently, as of today, **4.386% per month**. I will take this opportunity to clarify **what this means to members**: 4.386%/month is a cumulative result of **48.246% in** the current year!!! (11 months, without compound interest).

This in turn means, for example, that a **Gold member** has already earned 48.246% multiplied by 125% (his personal payout ratio) since January, an earning of 60.307%, based on his membership purchase price. This was exactly **\$15,076.75** that this "premium customer" was able to earn completely passively, **that is, in addition to the profits** he was able to earn **by applying** the marketing tools and/or the cryptos and here in particular with the various trading strategies.

This is only possible by choosing the right coaching partner, namely T4-Pro.

"It doesn't make sense to me. I have not yet earned any money but relatively much

Money paid. This is both historically so, as well as related to the current version. "

Response:

- 1.) **you have, as absolutely every member earns money every month**, see the execution above. Even so much that (estimated), already about half of the money you paid for a "premium membership" is already earned.
- 2.) 2) This is the case even though you have obviously not yet worked **on any** of the 2 currently available business areas.

- 3.) I understand what you want to say, even if it is wrong, namely that you have so far earned less than spent, which leads you to the **false assumption** to believe that **this is not earnings**, because the expenses have not yet been exceeded. (Note this is even tax law, so earnings!)

Comments:

Re 1: This is **undisputed**, there should be consensus on this.

Re 2: This is just as **indisputable**, since fact. But there you are not alone!

But this concerns and concerned, **far from ALL**.

For example, we have members who are active in marketing. This concerns both the past and the present. This is despite the fact that we had not officially "opened" this business field at any time.

That's why we only have about 80 members, which will change very soon and very violently.

All those who in the near or distant past, **used** the marketing tools provided by us (commission system and in more recent times also courses, in the past and present direct help with sponsoring and much more) **also earned money**.

This even on a very remarkable scale and all the more so because this field is **THE** "sleeping giant" (because not yet awakened) par excellence.

For example, one partner **earned over \$25,000** in **about three months** and of course received it in real time. This alone is **already a 6-digit figure** extrapolated over a year. In **addition**, there are profits from **crypto and trading** and last but not least the **completely passive** income from the EPP.

Likewise, we also have "**traders only**", **just as we** will see "**marketers only**" in the future, who have been renewing **their membership** every year for several years solely because of our market diagnostics.

Re 3: Of course, you can see it this way, but if you see it this way, then you can also see that even for you, who sees it this way, in any case, it **is at most a question of time** until this income = earnings. If we extrapolate the current figures, possibly (I don't want to hope it for you) **another year will pass** until this point is also reached for you.

Illustration of what it is about:

For example, buy a "golf course" that is expensive (everything in golf is expensive), but is expensive because the course provider advertises that by taking this course your **"handicap" will improve to such an extent that you** will win certain tournaments and be celebrated accordingly. **And that is exactly what you want.**

Now the course takes place, but you don't go. Therefore, the trainer/course leader has no chance to improve your "handicap". Therefore your "handicap" remains as it is. That's why you don't win a tournament. That's why you don't get celebrated. And that's why this course booking was not only an expense, but also a futile one.

Or you go and your handicap has improved. In the meantime, however, you refuse "to play golf" completely. Be it because you, out of new found conviction, reject this elitist game as "the devil's stuff" or because you had a "lumbago" that makes it permanently impossible for you to do so. **In either case, we have the same result.**

That's what you call bad luck!

We may **also** have **members who**, for whatever reason, temporarily (hopefully) or permanently **refuse to perform.**

So if you don't perform in **either one (marketing) or** the other **(trading)** field, the absolutely **lucrative business** fields, then you can't make money doing it.

Even if this is done in complete ignorance.

For example, if you don't learn how tradings work because you refuse to do or even watch the corresponding course, which a premium member can do at any time and completely free of charge, **you obviously can't make money** with it.

If they do this **anyway**, (meaning zero performance) they will **still have "success" with us.** Whether this success is to be "celebrated", **"depends on it"** and is certainly very individually different.

For some, this seems to be the case.

It's a good thing that appearances are always deceiving, which will become **clear in the** coming year.

Compared to the above (very unfortunately chosen) **illustrative example**, it's as if one of the **coaches, then invisible**, goes golfing with you, **you refuse to** even touch a club, **the coach plays all the balls**, comes to the "finish" with you, and gives you all the credit so **that it's you who is celebrated.**

But all kidding aside.

About two months ago, we started to activate the marketing field. This was **according to plan** and spread over **several steps**. Based on the experience gained there and also the new information that could be obtained, we have **decided, among other things**, as published sufficiently, to **bring forward step 3**.

This will **very significantly reduce the rate of** those who **refuse to do** so so far, or do not want to work with the traditional measures because they cannot.

So we will see a lot of activity in marketing, even among existing members in the coming year, as this **type of marketing, as** it will be accomplished **by completing Step 3, will turn off all the "negative" experiences of** marketing.

This will also be feasible in "high art", of course with (manageable) capital investment, **almost 100% fully automated**, i.e. without further service provision.

Information about all this will bring the reading of the book available shortly, whereby after its appearance, there will be practically no member (more), who does not know the contents of the book.

We are not far from that now, which is why I will end the explanations here and hope that there is now a little more clarity.

Remark:

A comparison to the **"historical considerations"** formulated above is always lame, as such, to the final version of the coaching program, which has been in operation for almost a year, is not possible. "That would be comparing apples with oranges!"

I close without further explanations to this with a literal quotation of a short passage from the book mentioned above.

It can be found again in **Chapter 2 "For whom this book (and message) is written"**, here a subtopic with the heading:

"How to recognize scams and how to protect yourself".

"A Simple "3 QUESTION Formula"

to avoid being "set up" with a "bear" who then turns out to be a "neck-biter" afterwards and hunts you down!

Is it very bright, the shine that deceives?

great story, giant background, according to the motto: the Queen is also in it or Beckenbauer (randomly chosen celebrity name) is in it ..., there are billions already invested, ... The government of...Phantastika-Land... is behind it, ... and the like)

is it easy "to be there", "to join in"?

You just have to register there or download your app, then you just have to store your money there and watch it multiply... or similar....

Do you have to do little to nothing, understand nothing, and will still be successful "in spite of it" and make a lot of money???

To abbreviate,

1.) Never do something you don't understand!

2.) if even one of these questions cannot be clearly answered with a NO, be careful. And in general!"

End quote.

Energetic greetings

to All Members!

Ralf Waldenmaier
